

## Special Districts Department Water and Sanitation Division

Luther Snoke  
Interim Director  
Steve Samaras  
Division Manager

### IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Este informe contiene información muy importante sobre su agua potable.  
Tradúzcalo o hable con alguien que lo entienda bien.

## Moabi Regional Park has Levels of Fluoride above the Drinking Water Standard

Our water system recently violated a drinking water standard. Although this is not an emergency, as our customers, you have a right to know what you should do, what happened, and what we are doing to correct this situation.

The County of San Bernardino, Special Districts Department, Water and Sanitation Division (Division) routinely monitors for the presence of drinking water contaminants. Water sampled on October 22, 2018 showed Fluoride levels of 1.3-2.3 micrograms/per liter (ug/L). Compliance for Fluoride monitoring is based on the Running Annual Average (RAA). The RAA for the 4th quarter 2018 was 2.3 ug/L. This is above the U.S. EPA standard or maximum contaminant level (MCL) of 2.0 ug/L.

### What should I do?

- **Children under the age of nine should use an alternative source of water that is low in fluoride.** You may also want to contact your dentist about proper use by young children of fluoride-containing products.
- This is not an emergency. If it had been, you would have been notified immediately. Rather, *this is an alert about your drinking water and a cosmetic dental problem that might affect children under nine years of age. At low levels, fluoride can help prevent cavities, but children drinking water containing more than 2 milligrams per liter (mg/L) of fluoride may develop cosmetic discoloration of their permanent teeth (dental fluorosis).*
- *Dental fluorosis may result in a brown staining and/or pitting of the permanent teeth. This problem occurs only in developing teeth, before they erupt from the gums. Children under nine should be provided with alternative sources of drinking water or water that has been treated to remove the fluoride to avoid the possibility of staining and pitting of their permanent teeth. You may also want to contact your dentist about proper use by young children of fluoride-containing products. Older children and adults may safely drink the water.*
- *Drinking water containing more than 4 mg/L of fluoride can increase your risk of developing bone disease. Although bone disease may develop in anyone exposed to years of drinking water containing more than 4 mg/L of fluoride, dental fluorosis can occur after a relatively short period of exposure (i.e. months) in children under the age of nine.*
- If you have other health issues concerning the consumption of this water, you may wish to consult your doctor
- Some home water treatment units are also available to remove fluoride from drinking water. To learn more about available home water treatment units, you may call Residential Water Treatment Device Registration Unit, Drinking Water Division, State Water Resources Control Board at (916) 449-5577 or visit their website at: [http://www.waterboards.ca.gov/drinking\\_water/certlic/device/watertreatmentdevices.html](http://www.waterboards.ca.gov/drinking_water/certlic/device/watertreatmentdevices.html)

### BOARD OF SUPERVISORS

ROBERT A. LOVINGOOD  
Chairman, First District

JANICE RUTHERFORD  
Second District

JAMES RAMOS  
Third District

CURT HAGMAN  
Vice Chairman, Fourth District

JOSIE GONZALES  
Fifth District

Gary McBride  
Chief Executive Officer

### **What happened? What is being done?**

Fluoride contamination is rarely due to human activity. Fluoride occurs naturally in some areas and is found in high concentrations in our source water.

The Division has applied for a grant to receive the funding needed to devise and implement a treatment protocol to remove the fluoride. The Division continues to work towards resolving the issue.

For more information, please contact Steve Samaras at 760-955-9885, or the Special Districts Department, Water and Sanitation Division at 2402 Industrial Blvd., Suite D-6, Victorville, CA 92395.

*Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this public notice in a public place or distributing copies by hand or mail.*

### **Secondary Notification Requirements**

Upon receipt of notification from a person operating a public water system, the following notification must be given within 10 days [Health and Safety Code Section 116450(g)]:

- SCHOOLS: Must notify school employees, students, and parents (if the students are minors).
- RESIDENTIAL RENTAL PROPERTY OWNERS OR MANAGERS (including nursing homes and care facilities): Must notify tenants.
- BUSINESS PROPERTY OWNERS, MANAGERS, OR OPERATORS: Must notify employees of businesses located on the property.

This notice is being sent to you by the County of San Bernardino, Special Districts Department, Water and Sanitation Division on behalf of Moabi Regional Park.

State Water System ID#: 3600193 Date distributed: November 05, 2018
