1 **EXECUTIVE SUMMARY**

A Phase I Environmental Site Assessment (ESA) was performed by Kleinfelder, for the San Bernardino County, Architecture and Engineering Department (Client), of a portion of land identified by the San Bernardino County Assessor as Assessor's Parcel Number (APN) 3093-251-01 in Victorville, California (Site). The Site is located northeast of Tokay Street, east of Cottonwood Avenue, and north of Bear Valley Road in the City of Victorville, San Bernardino County, California (see Figure 1, Site Location Map).

This report was prepared using the ASTM International (ASTM, formerly known as the American Society for Testing and Materials) Designation E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (the "Standard Practice"), and the All Appropriate Inquiry (AAI) section of the Small Business Liability Relief and Revitalization Act (the Federal Brownfields Law).

A summary of findings is provided below:

- The Site is located on a portion of land identified by the San Bernardino County Assessor as APN 3093-251-01. This parcel comprises approximately 8.75 acres of commercial-zoned vacant land; the Site is 5.248 acres of this parcel.
- The Site is and has been historically undeveloped land with no structures or improvements. Dirt roads have traversed the Site since as early as 1995.
- A wash extends across the Site from the southwest to the northeast. Water runoff from
 the shopping center located southwest of the Site drains into this wash. No staining or
 chemical odors were noted within the wash, and therefore this feature does not appear to
 represent an environmental condition for the Site.
- Urban dumping appears to have occurred at the Site with piles of soil, concrete, asphalt, trash, and landscape debris observed at the Site. The origin of the soil stockpiles is not known. It is also not known whether contaminants are present within the soil stockpiles.

In summary, it is not known whether contaminants are present within the soil piles that have been dumped at the Site. In Kleinfelder's opinion, the soil stockpiles of unknown origin represent a recognized environmental condition (REC). Kleinfelder's Phase I ESA did not identify controlled recognized environmental conditions (CRECs), historical RECs (HRECs), or *de minimis* environmental conditions associated with the Site.

Deviations from the Phase I ESA Standard (if any) are discussed in Section 8 of this report. This report is subject to the limitations in Section 2.5.

2 **INTRODUCTION**

This report is a summary of work performed using the guidelines set forth in ASTM Designation E 1527-13, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" (the ASTM Standard) and All Appropriate Inquiry (AAI) standards of the Small Business Liability and Revitalization Act (the "Brownfields Law"). This report also generally conforms to the ASTM Standard's suggested table of contents. Minor format modifications have been made to the ASTM Standard's suggested table of contents to assist in better reading and understanding the report findings.

2.1 PURPOSE

The purpose of this Phase I ESA is to identify, to the extent feasible pursuant to the scope of services defined in our Proposal No. MW151231.001P/RIV16P37969, dated April 7, 2016 and limitations discussed in this report, RECs. As defined in the ASTM Standard, a REC is:

The presence or likely presence of any hazardous substances or petroleum products in, on or at a property: (1) due to a release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

As defined in the ASTM Standard, a de minimis condition is:

A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

ASTM Standard E 1527-13 also introduces the designation of CREC. As defined in the ASTM Standard a CREC is:

A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory

authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

Additionally, the ASTM Standard defines HRECs, as:

A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

The final decision on whether a past release is an HREC rests with the environmental professional (EP), and will be influenced by the current impact (if any) of the past release to the Site.

This report describes Kleinfelder's assessment methodology and documents our findings, subject to the limitations presented in Section 2.5 of this report.

Kleinfelder professionals conducting this Site assessment included Ms. Lindsey Dandridge-Perry, Environmental Professional and the primary author of this report. Ms. Kathleen McDonnell, also an Environmental Professional, provided project oversight. Resumes of Environmental Professionals are available from Kleinfelder upon request.

2.2 DETAILED SCOPE-OF-SERVICES

The following sections describe Kleinfelder's work scope:

- Section 2, Introduction, includes a discussion of the purpose/reason for performing the Phase I ESA, additional services requested by the Client (e.g., an evaluation of business environmental risk factors associated with the Site), significant assumptions (e.g., property boundaries if not marked in the field), limitations, exceptions, special terms and conditions (e.g., contractual), and user reliance parameters.
- Section 3, Site Description, is a compilation of information concerning the Site location,
 legal description, current and proposed use of the Site, a description of structures and

improvements on the Site at the time of Kleinfelder's assessment, and adjoining property use.

- Section 4, Records Review, is a compilation of Kleinfelder's review of several databases available from Federal, State, and local regulatory agencies regarding hazardous substance use, storage, or disposal at the Site; and for off Site facilities within the search distances specified in the ASTM Standard. Records provided by the Client are summarized and copies of relevant documents are included in the appendices of this report. Physical setting sources (including topography and soil and groundwater conditions) and typical Client-provided information (e.g., title records, environmental liens, specialized knowledge, valuation reduction for environmental issues, and owner, property manager, and occupant information) are also summarized in this section. Other interviews with people, if available, knowledgeable about the Site (including the Client) are included in Section 7.
- Section 5, History of the Site, summarizes the history of the Site and adjoining properties. This Site history is based on various sources, which may include a review of historical aerial photographs, Sanborn Fire Insurance Maps, city or suburban directories, historical topographic maps, building department records, and results of previous Site assessments (if any and reasonably ascertainable).
- Section 6, **Site Reconnaissance**, describes Kleinfelder's observations during the Site reconnaissance. The methodology used and limiting conditions, are described.
- Section 7, Interviews, is a summary of telephone and personal interviews performed with
 "Key Site Managers" that may include the Site owner/manager, occupants/tenants, local
 government officials, and the Client. Additional interview sources may be contacted if Key
 Site Managers were not available prior to production of this report, and may include
 adjoining landowners and people with historical knowledge of the area.
- Section 8, Evaluation, is a presentation of our findings and opinions regarding the information in Sections 3 through 7, and presents our conclusions regarding the presence of RECs, HRECs, CRECs, and *de minimis* conditions connected with the Site, and recommendations.
- Section 9, **References**, is a summary of some of the resources used to compile this report.

6A statement of qualifications of the signatories of this report is provided in Appendix A of this report, and pertinent documentation regarding the Site is included in Appendices B through D.

2.3 ADDITIONAL SERVICES

An evaluation of business environmental risk associated with the Site was not included in Kleinfelder's scope of services. The scope of this Phase I ESA does not incorporate ASTM Standard non-scope considerations such as asbestos-containing materials, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, and high-voltage power lines.

2.4 SIGNIFICANT ASSUMPTIONS

Kleinfelder does not guarantee the accuracy of the information supplied by its sources, but reserves the right to rely on this information in formulating a professional opinion on the potential for contamination at the Site. Kleinfelder also assumes the Client provided all applicable and available environmental records and specialized knowledge regarding the Site. Kleinfelder has not made other significant assumptions during the performance of this Phase I ESA.

2.5 LIMITATIONS AND EXCEPTIONS

Phase I ESAs are non-comprehensive by nature and may not identify all environmental problems, and will not eliminate all risk. This report is a qualitative assessment. Kleinfelder offers a range of investigative and engineering services to suit the needs of our clients, including more quantitative investigations. Although risk can never be eliminated, more detailed and extensive investigations yield more information, which may help the Client understand and better manage risks. Since such detailed services involve greater expense, we ask our clients to participate in identifying the level of service, which will provide them with an acceptable level of risk. Please contact the signatories of this report if you would like to discuss this issue of risk further.

Kleinfelder performed this Phase I ESA in general accordance with the guidelines set forth in the ASTM Standard, and the proposed scope subsequently approved by our Client. No warranty, either express or implied, is made. Environmental issues not specifically addressed in this report were beyond the scope of our services and not included in our evaluation.

This report may be used only by the Client and only for the purposes stated within a reasonable time from its issuance, but in no event later than 1 year from the date of the report. Land or facility use, on- and off-Site conditions, regulations, or other factors may change over time, and additional

work may be required with the passage of time. Since Site activities and regulations beyond our control could change at any time after the completion of this report, our observations, findings, and opinions can be considered valid only as of the date of the Site visit. Pursuant to the ASTM Standard's Section 4.6, this report should not be relied upon after 180 days from the date of its oldest component. Any party other than the Client who wishes to use this report shall notify Kleinfelder of such intended use. Based on the intended use of the report, Kleinfelder may require that additional work be performed and that an updated report be issued. Non-compliance with any of these requirements by the Client or anyone else will release Kleinfelder from any liability resulting from the use of this report by any unauthorized party, but only to the extent of any such non-compliance by the Client.

2.6 SPECIAL TERMS AND CONDITIONS

No special terms and conditions were agreed to by the Client and Kleinfelder.

3 SITE DESCRIPTION

The Site description is presented in this section and describes the condition of the Site at the time of the Phase I ESA. The Site location is shown on Figure 1. Tables 3-1 through 3-4 summarize the physical characteristics of the Site and adjoining properties.

3.1 LOCATION AND LEGAL DESCRIPTION

The information presented in Table 3-1 includes the physical location and legal description (if provided by the Client) of the Site. This information was obtained from review of various maps (such as topographic maps and tax assessor maps), aerial photographs, public records at City and/or County offices, interviews, and/or information provided by the Client.

Table 3-1
Location and Legal Description

PARAMETER	INFORMATION/COMMENTS
LOCATION	The Site is located northeast of Tokay Street, east of the intersection of Tokay Street and Cottonwood Avenue in the City of Victorville, San Bernardino County, California (see Figure 1, Site Location Map).
ASSESSOR'S PARCEL NUMBERS	The Site is a portion of San Bernardino County APN 3093-251-01.
LEGAL DESCRIPTION	The legal description of the Site is provided in Exhibit "A" of Environmental Data Resources, Inc.'s (EDR) <i>EDR Environmental Lien and AUL Search</i> report (EDR, 2016a) dated September 19, 2016, which is presented in Appendix C.
ADDRESS(ES)	An address is not listed for the property on the San Bernardino County assessor website (http://www.mytaxcollector.com/trSearchProcess.aspx).
SECTION, TOWNSHIP, AND RANGE	Township 5 North, Range 4 West, Section 1, San Bernardino Meridian.
ZONING	Based on a City of Victorville Zoning Map obtained from the City of Victorville website (http://www.victorvilleca.gov/uploadedFiles/CityDepartments/Development/Zoning%20Map.pdf), last updated January 11, 2010, the Site has a zoning designation of "C-2" for General Commercial.

3.2 CURRENT / PROPOSED USE OF THE PROPERTY

At the time of Kleinfelder's assessment, land use in the general Site vicinity appeared to be vacant undeveloped land or commercial property. Current and proposed uses are described in Table 3-2.

Table 3-2
Current / Proposed Uses

PARAMETER	GENERAL OBSERVATIONS
CURRENT USE	The Site is currently vacant undeveloped land.
PROPOSED USE	Proposed San Bernardino County fleet building.

3.3 DESCRIPTION OF STRUCTURES / IMPROVEMENTS

Structures and/or improvements observed on the Site at the time of Kleinfelder's Site reconnaissance are described in Table 3-3.

Table 3-3
Structures / Improvements

PARAMETER	GENERAL OBSERVATIONS
STRUCTURES	The Site is undeveloped.
IMPROVEMENTS	There are no improvements on the Site

3.4 CURRENT USES OF ADJOINING PROPERTIES

Kleinfelder performed a brief drive-by survey of the properties adjoining to the Site on September 28, 2016. A summary of the surrounding properties is presented in Table 3-4 and shown on Figure 2, Site Vicinity Aerial Photograph.

Table 3-4 Adjoining Properties

DIRECTION	LAND USE DESCRIPTION
NORTH	Undeveloped land.
EAST	Storage facility with street address of 12176 Locust Avenue.
SOUTH	Undeveloped land.
WEST SOUTHWEST	Undeveloped land. Grocery Store, retail shopping center.

No indications of obvious or suspect RECs were apparent on the adjoining properties at the time of Kleinfelder's Site reconnaissance.

4 RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

The purpose of the records review was to obtain and review records that would help to evaluate RECs of potential concern in connection with the subject Site and bordering properties. Federal, state and local regulatory agencies publish databases or "lists" of businesses and properties that handle hazardous materials or hazardous waste, or are the known location of a release of hazardous substances to soil and/or groundwater. These databases are available for review and/or purchase at the regulatory agencies, or the information may be obtained through a commercial database service. Kleinfelder contracted a commercial database service, EDR of Shelton, Connecticut to perform the government database search for listings within the appropriate ASTM minimum search distance of the Site. Kleinfelder provided EDR with a Site map to incorporate the search distances from the Site boundary. Included in The EDR Radius MapTM Report with GeoCheck® is a listing of specific databases outlined by the ASTM Standard. If required, the search distances included an extended radius from those specified by ASTM. A listing of the search distances, databases evaluated, dates the databases were last updated, and types of information contained in each database are included in the regulatory database search provided as Appendix B to this report (EDR, 2016b).

EDR utilizes a geographical information system to plot the locations of reported spills, leaks, incidents, etc. Kleinfelder reviews this information to help establish if the Site, or nearby properties, have been included in the noted databases and lists. Each of the listings was reviewed to assess whether the corresponding property details included in the EDR report revealed a potential environmental impact to the Site. A number of listings in the EDR database report were found not to have the potential to impact the Site based on the following, or a combination thereof:

- The listed property was located at a distance where the facility would be unlikely to impact
 the Site based on Kleinfelder's evaluation of the relevant data in the EDR report and
 knowledge of the Site vicinity.
- The listed property was located in a down-gradient or cross-gradient direction from the Site, based on the anticipated direction of groundwater flow (varies east, northeast and southeast based on information obtained from the State Water Resources Control Board [SWRCB] GeoTracker™ database) at the property being evaluated, and is located at a distance that would be unlikely to impact the Site. Note that groundwater flow direction

may be variable in the vicinity of the Site and determinations as to down- or cross-gradient direction were made only when groundwater flow direction was available for a specific property.

- The listed property was identified in the UST or Small Quantity Generator (SQG) databases and was not on, or immediately adjoining the Site. The property was not listed in other databases that reported a release of a hazardous substance or petroleum product and/or was not listed as having environmental violations. The listing of a facility on these databases alone is not indicative of an unauthorized release.
- The listing for the facility suggested a short-term release had occurred (i.e., from incidental traffic accidents, or chemicals from illegal drug labs found at residences) with associated response actions completed.
- The quantity of the hazardous substances or petroleum product released from an off-site facility was not considered to have resulted in contamination above the most stringent criteria that would require regulatory action. Therefore, no impact to the Site is anticipated.
- The listed property record indicates that the property was characterized, the reported release affected soil only, the listed property was not on or adjacent to the Site, and the release was not recognized as indicative of area-wide conditions or was characterized as a soil removal action only.
- The listed property record indicates that contamination on the property is limited to relatively non-mobile contaminants, including polyaromatic hydrocarbons (PAHs) and metals, in soil only, on a non-adjacent property.
- The listed property record indicates that the case has been closed to the satisfaction of the designated lead regulatory agency and residual contamination, if present, is not considered likely to affect the Site based on one or more of the criteria mentioned in the bulleted items above (referred in the ASTM Standard as an HREC).

Based on these criteria indicating no material threat of a release that affected the Site and/or no release that could require future regulatory agency oversight, these listings were not evaluated further and are not discussed in the following sections.

4.2 RESULTS OF DATABASE SEARCH

The remaining property listings were reviewed to assess whether these properties had environmental releases, which may have resulted in RECs in relation to the Site. The listed

properties (if any) for which a reported release may have resulted in a REC were further assessed by performing a review of agency files available through the SWRCB's GeoTracker™ website (http://geotracker.waterboards.ca.gov/) and other relevant regulatory agency websites, to evaluate whether the listed release represents a potential impact to the Site.

4.2.1 Site Listings

The Site was not listed in databases searched by EDR.

4.2.2 Off-Site Listings

"HI Desert Cleaners" with street address of 14962 Bear Valley Road, No. E, was assessed as potential concern to the Site. A summary of the information is included in Table 4-1.

Table 4-1
Off-Site Facilities of Potential Concern

FACILITY OR SITE NAME	FACILITY OR SITE ADDRESS	PROXIMITY TO SITE (FEET)	COMMENTS
"HI Desert Cleaners"	14962 Bear Valley Road, No. E	Approximately 540 feet southwest	This facility is listed as a small quantity hazardous waste generator and a drycleaner with no violations. Due to the distance from the Site, and no reported releases from this facility, it is Kleinfelder's opinion that this facility is not likely to have affected soil, soil vapor or groundwater beneath the Site, and is not a REC.

4.2.3 Orphan List

Sites not plotted by EDR due to poor or inadequate address information are referred to as orphan sites. There is one unmapped orphan site in the EDR report. The orphan summary/unmapped site report was reviewed to assess the potential for listed facilities to pose a REC to the Site. Based on our review, this listing is for an apartment located west of the Site listed in the Clandestine Drug Lab database. Due to the distance from the Site, in Kleinfelder's opinion this facility does not to pose an environmental concern to the Site.

4.3 OTHER RECORDS REVIEWED / AGENCIES CONTACTED

The following additional sources of environmental records were reviewed during this Phase I ESA for the purposes of meeting the ASTM Standard. Local regulatory agencies were contacted for reasonably ascertainable and practically reviewable documentation regarding RECs present at the Site. Adjoining facilities were not considered potential environmental concerns likely to impact soil, soil vapor or groundwater beneath the Site; therefore, a review of records for adjoining properties was not deemed necessary, and not performed for this Phase I ESA. Summaries of interviews with local regulatory agency representatives are included in Section 7 of this report (with interview documentation included in Appendix C). The following agencies (if marked with an "X") were contacted for documentation:

	State of California, Division of Oil, Gas, and Geothermal Resources (DOGGR)
	South Coast Air Quality Management District (SCAQMD)
\boxtimes	City of Victorville
\boxtimes	San Bernardino County Fire Department (SBCFD)
	State Water Resources Control Board / GeoTracker™ Database
	Pipeline and Hazardous Materials Safety Administration (PHMSA), National Pipeline
	Mapping System (NPMS)
	Department of Toxic Substances Control (DTSC), EnviroStor Database

Information from these agencies is presented below.

4.3.1 State of California, Division or Oil, Gas, and Geothermal Resources

The DOGGR was not contacted for this Phase I ESA because information concerning oil and gas fields was obtained by Kleinfelder from DOGGR's Well Finder database (http://maps.conservation.ca.gov/doggr/index.html). Findings from the map review are discussed in Table 4-1, and a copy of the DOGGR well finder search results are provided in Appendix C.

4.3.2 South Coast Air Quality Management District

Kleinfelder reviewed the SCAQMD's FINDS internet web site

(http://www3.aqmd.gov/webappl/fim/prog/search.aspx) for permit information for the Site. No records pertaining to the Site were available on the FINDS website. A copy of the FINDS map showing SCAQMD permitted facilities in the Site vicinity is provided in Appendix C.

4.3.3 City of Victorville Building and Safety / Planning Departments

Kleinfelder submitted a written request to the City of Victorville, Office of the City Clerk to obtain Building and Safety permit and Planning/Development Department information for the Site on September 23, 2016. The City of Victorville responded in an email dated October 5, 2016, that there were no records available for the Site. A copy of the City of Victorville response is provided in Appendix C.

4.3.4 San Bernardino County Fire Department

Kleinfelder submitted a written request to the SBCFD for information pertaining to the Site on September 20, 2016. SBCFD responded in a letter dated September 27, 2016, that it had no records for the Site. A copy of the SBCFD letter is provided in Appendix C.

4.3.5 State Water Resources Control Board / GeoTracker™ Database

Kleinfelder reviewed the SWRCB GeoTracker[™] website for information pertaining to the Site and adjoining properties of concern. Records were not available for the Site or for adjoining properties. A copy of the GeoTracker[™] search results is provided in Appendix C.

4.3.6 Pipeline and Hazardous Materials Safety Administration, National Pipeline Mapping System

According to the California State Fire Marshal, pipeline information is available at the PHMSA's online NPMS (https://www.npms.phmsa.dot.gov). Kleinfelder researched pipeline information on the NPMS on September 23, 2016 for the Site and vicinity. Based on our review of the NPMS, there are no mapped natural gas transmission pipelines or hazardous liquid pipelines located on the Site or on properties in the immediate Site vicinity. A copy of the NPMS map is included in Appendix C.

4.3.7 State Department of Toxic Substances Control, EnviroStor Database

Kleinfelder reviewed the DTSC Envirostor online database

(http://www.envirostor.dtsc.ca.gov/public) for information pertaining to the Site and adjoining properties. Records were not available for the Site or for adjoining properties. A copy of the Envirostor search results is presented in Appendix C.

4.4 PHYSICAL SETTING SOURCE(S)

Table 4-2 presents information concerning the physical setting of the Site. This information was obtained from published maps.

Table 4-2
Physical Setting

DATA	GENERAL INFORMATION
USGS TOPOGRAPHIC QUADRANGLE	Based on a review of the United States Geological Survey (USGS) Hesperia, California 7.5-Minute Series (Topographic) Quadrangle Map dated 2012, the Site is located at elevations ranging between 3,110 and 3,125 feet above mean sea level. The topographic relief slopes generally toward the northeast.
SOIL TYPE	Soil beneath the Site consists of undifferentiated alluvium (Bortugno, E.J. and Spittler, T.E., 1986 [Revised 1998]). According to the Physical Setting Source Summary provided in EDR's database report (EDR, 2016b), the Site is situated in an area with a Soil Component referred to as "Bryman" and consists of coarser grained well-draining material.
OIL AND GAS WELLS	Kleinfelder reviewed DOGGR's Well Finder online database for oil and gas wells that may be located on the Site and in the Site vicinity. Based on our review, no oil or gas wells are located on, or within a mile of the Site.

Information about the regional geology is presented in Table 4-3. This information was obtained by Kleinfelder from published data and maps, interviews with public agencies, and/or previous investigations performed by Kleinfelder in the Site vicinity.

Table 4-3
Regional Geology and Hydrogeology

PHYSICAL PARAMETER	INFORMATION/COMMENTS		
REGIONAL PHYSIOGRAPHY AND GEOLOGY	The Site is located in the Mojave Desert geomorphic province. The Mojave Desert is located in southeastern California and is bounded to the southwest by the San Andreas fault and the Transverse Ranges, and to the north and northeast by the Garlock fault and the Basin and Range geomorphic province. The Nevada state line and the Colorado River form the arbitrary eastern boundary, although the province actually extends into southern Nevada and western Arizona. The Mojave Desert is characterized by mountain ranges separated by desert plains and playas. Northwest to southeast trending fault zones and west to east trending fault zones control the topography (CGS, 2002).		
REGIONAL HYDROGEOLOGY	The Site is located within the Upper Mojave River Valley Groundwater Basin of the South Lahontan Hydrologic Region. The Upper Mojave River Valley Groundwater Basin consists of an elongate north-south valley bounded by basement rocks outcropping near the town of Helendale in the north; quaternary sedimentary deposits and basement rocks of the San Bernardino Mountains to the south; the Helendale fault to the southeast; basement rock and the mountains surrounding Apple Valley to the east; a surface drainage divide between the Upper Mojave Groundwater Basin and the El Mirage Valley Basin, and Shadow Mountain to the west (CDWR, 2004). The primary water-bearing units consist of regional Pliocene and younger alluvial fan deposits (fan unit), and of overlying Pleistocene and younger river channel and floodplain deposits (floodplain unit) (CDWR, 2004).		
DEPTH TO GROUNDWATER AND DIRECTION OF ANTICIPATED FLOW ¹	According to a <i>Phase II Environmental Site Assessment Report</i> for a Former Dry Cleaner located at 14520 Seventh Street in Victorville (approximately 3 miles northeast of the Site), groundwater was measured at 91.91 feet below the surface (The Reynolds Group, 2015). Groundwater flow direction was not available, but is presumed to follow topographic trends and flow to the northeast.		
REGIONAL GROUNDWATER QUALITY PROBLEMS	Groundwater near Victorville contains sodium bicarbonate. High nitrate concentrations are present in the southern portion of the Upper Mojave River Valley Groundwater Basin and high iron and manganese are found near Oro Grande. The former George Air Force Base, located northwest of Victorville, is a federal Superfund site and groundwater has been contaminated with trichloroethylene (TCE). Based on review of the US EPA website, the George Air Force Base TCE plume encompasses a 600-acre area that extends off the northeast portion of the Air Force Base (https://yosemite.epa.gov/r9/sfund/r9sfdocw.nsf/ViewByEPAID/CA257002 4453#threats). LUST sites located in Victorville have contributed fuel additives constituents to groundwater including benzene, toluene, ethylbenzene, xylenes, and methyl tertiary butyl ether (CDWR, 2004). Note that no groundwater data was available for beneath the Site or Site vicinity.		

Table 4-3 (Continued) Regional Geology and Hydrogeology

PHYSICAL PARAMETER	INFORMATION/COMMENTS
WATER SUPPLY	There is no water supply on Site.
FLOOD ZONE DESIGNATION	According to The EDR Radius Map™ Report with GeoCheck®, the Site is not located within a 100-year or 500-year flood zone (EDR, 2016b).

¹ Groundwater flow direction is based on regional information sources. Site-specific conditions may vary due to a variety of factors including geologic anomalies, utilities, nearby pumping wells (if present), and other factors.

4.5 USER PROVIDED INFORMATION

Kleinfelder understands that the Client is requesting a Phase I ESA be performed of the Site prior to purchasing the Site. Information regarding the current owners/occupants of the Site is summarized in Table 4-4.

Table 4-4
Owner / Occupant Information

ENTITY	NAME
OWNER	According to the EDR Environmental Lien and AUL Search report (EDR, 2016a), the current owner of the Site is America Plus Bank.
OCCUPANT(S)	The Site is currently vacant and undeveloped.

Summaries of interviews of key individuals with knowledge of the Site ("Key Site Managers") are provided in Section 7. The following sections present information provided to Kleinfelder by the Client.

4.5.1 Title Records

A chain-of-title report was not provided by the Client. Therefore, a review of a chain-of-title report was not performed as part of this Phase I ESA.

4.5.2 Environmental Liens and Usage Limitations

According to information provided in EDR's regulatory agency database search report (EDR, 2016a), there are no liens pertaining to the Site listed in the Federal Superfund Liens List maintained by United States Environmental Protection Agency (US EPA), and no known recorded land-use environmental deed restrictions pertaining to the Site listed in the State Liens Database.

Based on a review of the EDR Environmental Lien and AUL Search report (EDR, 2016g), environmental liens and AULs were not found for the Site.

4.5.3 Value Reduction

As part of the ASTM Designation E 1527-13 process, information is to be gathered regarding the prospective purchase price of the Site relative to its fair market value. If there appears to be a value reduction, that reduction must be identified with respect to whether the difference could be attributed to environmental degradation of the property. Based on communication with the Client on October 10, 2016, the purchase price of the Site represents its fair market value. A copy of the completed questionnaire is provided in Appendix C.

4.5.4 Other Information/Documents Provided

Kleinfelder was not provided with other information or documents pertaining to the Site.

5 **HISTORY OF THE SITE**

The history of the Site was researched to identify obvious uses. Historical land use was researched to the first developed use, or back to 1940, whichever was earlier or readily available. Table 5-1 summarizes the availability of information reviewed during this assessment.

Table 5-1
Historical Information Sources

SOURCE	YEARS REVIEWED	SOURCE / AVAILABILITY
SANBORN FIRE INSURANCE MAPS	Not available	EDR, 2016c
AERIAL PHOTOGRAPHS	1953, 1959, 1968, 1975, 1984, 1995, 2005, 2009, 2010, and 2012	EDR, 2016d
CITY DIRECTORIES	1975 to 2013 (select years)	EDR, 2016e
HISTORICAL TOPOGRAPHIC MAP REPORT	1902, 1942, 1956, 1968, 1980, and 2012	EDR, 2016f
BUILDING DEPARTMENT	Not available	EDR, 2016g; City of Victorville
PREVIOUS ASSESSMENT(S)	Not applicable	Not available

5.1 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance Maps provide historical land use information for some metropolitan areas and small, established towns. Kleinfelder requested EDR to search its library of Sanborn Fire Insurance Maps for maps of the Site. EDR responded that Sanborn Fire Insurance Maps were not available for the Site (EDR, 2016c).

5.2 AERIAL PHOTOGRAPHS

A review of historical aerial photography may indicate past activities at a property that may not be documented by other means or observed during a reconnaissance visit. The effectiveness of this technique depends on the scale and quality of the photographs and the available coverage. Aerial photographs were obtained from several historical photograph collections through EDR (2016d), and span a period of 63 years. A tabulation of the aerial photographs reviewed by Kleinfelder is presented in Table 5-2. Copies of the aerial photographs provided by EDR are included in Appendix D.

Table 5-2
Historical Aerial Photographs Reviewed

YEAR	APPROXIMATE SCALE	SUMMARY
1953	1"=500°	Site: The Site was undeveloped land with no evidence of structures or other features. A wash appears to extend from the northeast corner, southwest through the Site. Surrounding Area: The surrounding area was undeveloped. A road extending east to west is located south of the Site. Another road extending northeast to southwest is located west and northwest of the Site.
1959 1968 1975	1"=500'	Site: The Site remains undeveloped. Surrounding Area: The immediate Site vicinity is undeveloped to the east, west, and south. A dirt road extends east to west, north of the Site. The area farther to the south appears crisscrossed with roads and sparse residential-type buildings. In 1968 and 1975, dirt roads extend north to south in the Site Vicinity.
1984	1"=500'	Site: The Site remains undeveloped. Surrounding Area: The surrounding site vicinity remains undeveloped with bisecting dirt roads. The land adjoining to the southern half of the Site to the east appears graded, and commercial-type buildings are present southeast of the Site. Areas on the land to the southwest and south also appear graded.
1995	1"=500'	Site: The Site remains undeveloped. Dirt roads extend through the northwest corner and southern portion of the Site. Surrounding Area: The immediate Site vicinity to the east, north, and west remain the same. The commercial buildings remain present to the southeast and additional commercial buildings are now located to the southwest. A paved road extends along the northern boundary of the southwest-adjoining commercial property. The surrounding area beyond the adjoining properties shows increased commercial development.
2005 2009 2010 2012	1"=500'	Site: The Site appeared generally the same as on the 1995 aerial photograph. Surrounding Area: Changes to the surrounding area from the 1995 photograph included the present-day structures adjoining to the east of the Site.

The aerial photograph review did not reveal evidence of a REC to the Site.

5.3 CITY DIRECTORIES

City directories provide information regarding property occupants by address. EDR provided a city directory abstract, included in Appendix D, for the period between 1975 and 2013 (EDR, 2016e). No listings were available for the Site. A summary of Adjoining Facility listings is provided in Table 5-3.

Table 5-3
City Directory Listings (Adjoining Facilities)

ADDRESS(ES)	SUMMARY OF OCCUPANT(S)	
East		
12176 Locust Avenue	2013: StorAmerica 2003: Occupant Unknown 1999: American Mini Storage Limited 1992-1995: American Mini Storage LTD	

The adjoining listings were reviewed to assess the potential for types of facilities that may affect soil, soil vapor or groundwater beneath the Site. A storage facility was identified as being located on the property adjoining the Site to the east. This property is not considered by Kleinfelder to represent a REC to the Site.

5.4 HISTORICAL TOPOGRAPHIC MAP REVIEW

Kleinfelder obtained information regarding historical topographic maps of the Site vicinity from EDR (2016f). The topographic maps reviewed for this assessment are listed in Table 5-4 and copies of the maps are included in Appendix D.

Table 5-4
Historical Topographic Maps Reviewed

YEAR	SCALE	SUMMARY
1902	1:62,500	Site: The Site was undeveloped with no structures or other features shown. Surrounding Area: The immediate Site vicinity was undeveloped with a road shown less than 0.5-mile west of the Site
1942	1:62,500	Site: The Site was undeveloped with no structures or other features shown. Surrounding Area: The immediate Site vicinity remained undeveloped. US Highway Route Number (No.) 66 is located west of the Site along with a dirt road. A road is located extending east to west, south of the Site. Some structures are present more than 0.5-mile north of the Site.
1956	1:24,000	Site: The Site was undeveloped with no structures or other features shown. Surrounding Area: The immediate Site vicinity remained undeveloped. US Highway No. 66 and the road south of the Site remain. The area south of the road and southwest of the Site appears to be developed with roads and sparse buildings.
1968	1:24:000	Site: The Site was undeveloped with no structures or other features shown. Surrounding Area: The immediate Site vicinity remained undeveloped. The area beyond the immediate Site vicinity to the north (other side of US Highway 66), east, and south (other side of road) appear developed with roads and sparse structures.
1980	1:24:000	Site: The Site was undeveloped with no structures or other features shown. Surrounding Area: The immediate Site vicinity remained undeveloped. The area farther to the east and north no longer appear developed.
2012	1:24:000	Site: The Site was undeveloped with no structures or other features shown. Surrounding Area: A road extends to the southwest corner of the Site from Cottonwood Avenue located west of the Site. Roads are shown throughout the Site vicinity

The topographic review did not reveal evidence of a REC to the Site.

5.5 BUILDING DEPARTMENT

EDR provided a building permit report (EDR, 2016g) indicating no permits were found for the Site. Kleinfelder contacted the City of Victorville, Office of the City Clerk to obtain Building and Safety permit information for the Site. The City of Victorville responded in an email dated October 5, 2016 that there were no available records for the Site.

5.6 PREVIOUS ASSESSMENTS

Previous assessment reports were not provided by the Client and were not found in regulatory agency records searched.

6 SITE RECONNAISSANCE

Kleinfelder's Phase I ESA activities included a Site reconnaissance. This section summarizes the findings from the Site reconnaissance.

6.1 METHODOLOGY AND LIMITING CONDITIONS

Ms. Karin Hagan of Kleinfelder performed a Site reconnaissance on September 28, 2016. The Site reconnaissance included a visual inspection of the Site to assist in identifying the presence or likely presence of hazardous substances or petroleum hydrocarbons under conditions that indicate an existing release, a past release, or threat of release into structures, soil, groundwater, or surface water at the Site (i.e., RECs). Observations of readily-apparent environmental conditions are summarized in Table 6-1, and color photographs of the Site are presented on Figures 3 through 7. The approximate Site boundaries are shown on Figure 2, "Site Vicinity Aerial Photograph."

6.2 GENERAL SITE SETTING

The Site is vacant land located east and northeast of Tokay Street in an area used predominantly for commercial purposes.

6.3 SITE OBSERVATIONS

Kleinfelder's Site observations are summarized in Table 6-1.

Table 6-1
Site Observations

GENERAL OBSERVATIONS	REMARKS	OBSERVED	NOT OBSERVED
Current use	The Site is vacant and undeveloped.	X	
Current use likely to indicate RECs			Х

Table 6-1 (Continued) Site Observations

GENERAL OBSERVATIONS	REMARKS	OBSERVED	NOT OBSERVED
Past use			Х
Past use likely to indicate RECs			Х
Structures	The Site is vacant and undeveloped.		Х
Roads	Dirt road crosses southwest to north	X	
Topography of Site and surrounding area	The Site generally slopes to the northeast, although the northern half of the Site was observed to slope slightly west; and the southern half of the Site was observed to slightly slope east.	X	
Aboveground storage tanks (ASTs)			Х
Below grade vaults			X
Burned or buried debris	Partially buried concrete rubble	Х	
Chemical storage			Х
Chemical mixing areas			Х
Discolored soil or water			X
Ditches, streams	Wash extends from the southwest corner of the Site (from shopping center) to northeastern Site boundary	X	
Interior and exterior observations or environmental conditions that may involve the use, storage, disposal or generation of hazardous substances or petroleum products.		Observed	Not Observed

Septic system (e.g. tank and leach fields)			X
Soil piles	Soil mixed with asphalt pile from unknown source.		X
Solid waste/evidence of unauthorized dumping	Landscape debris including grass, soil, and sprinklers. Scattered urban debris. Asphalt and concrete piles.	X	
Stained pavement, soil or concrete			X
Stains or corrosion (interior, non-water)			X
Storm drains/catch basins			X
Stressed vegetation			X
Sumps and clarifiers			X
Surface water	Apparent runoff water is present in the southwest portion of the Site, within a portion of the wash.	X	
UST(s) (including heating oil tanks)			Х
Unidentified substance containers			Х
Waste water discharge			Х
Water supplies (potable and process)			Х
Wells (irrigation, monitoring, or domestic)			х
Wells (dry)			Х
Wells (oil and gas)			Х

6.4 RESULTS OF SITE RECONNAISSANCE

The Site consists of vacant undeveloped land. A wash extends from the southwest corner of the Site (near the end of Tokay Street and the shopping center) to the northeast side of the Site. Some standing water was present in the southwestern portion of the wash, likely runoff from the sprinklers at the shopping center. A dirt road extends diagonally from the west side of the Site to the northern border. A concrete washout/dump area was observed northwest and adjoining this road, and an asphalt mix pile and small dented gas (propane) cylinder were observed southeast and adjoining this road. Scattered urban debris/trash dumping and a pile of landscaping debris was present in the middle of the Site, and a pile of mixed dirt and asphalt rubble was present in the south east portion of the Site. A homeless camp was located northeast and adjoining the Site (near the corner of the storage facility). Evidence of USTs, pits, ponds, or lagoons was not observed on the Site during the reconnaissance.

6.5 INTERVIEW WITH CLIENT/OWNER/MANAGER

Mr. Scott Hughes, Project Manager for San Bernardino County, completed a questionnaire on October 5, 2016. Mr. Hughes is unaware of environmental cleanup liens or AULs associated with the Site. In addition, he is unaware of past uses of the Site and does not have specialized knowledge or experience related to the Site or surrounding properties. A copy of the completed questionnaire is provided in Appendix C.

6.6 INTERVIEW WITH OCCUPANTS

The Site is not currently occupied. The property owner refused to complete a questionnaire on the basis that the property is for sale "as is".

6.7 INTERVIEWS WITH LOCAL GOVERNMENT OFFICIALS.

Information obtained from regulatory agencies contacted by Kleinfelder is discussed in Section 4.3.

7 **EVALUATION**

Kleinfelder performed this Phase I ESA of the Site consistent with the scope and limitations of ASTM Designation E 1527-13. The following sections describe Kleinfelder's findings and provide general background information about the Site. Findings address RECs, CRECs, HRECs, and notation of *de minimis* quantities, as applicable to the Site. In summary, Kleinfelder's assessment revealed the following information concerning the Site:

7.1 BACKGROUND

- The Site is located on a portion of land identified by the San Bernardino County Assessor as APN 3093-251-01. The Site consists of 5.248 acres of commercial zoned vacant land.
- The Site is and has been historically undeveloped land with no structures or improvements. Dirt roads have traversed the Site since as early as 1995.

7.2 FINDINGS AND OPINIONS

The following is a summary of the findings and opinions of this Phase I ESA:

- The Site has historically been vacant and undeveloped.
- A wash extends across the Site from the southwest to the northeast. Water runoff from
 the shopping center located southwest of the Site drains into this wash. No staining or
 chemical odors were noted within the wash, and therefore this feature does not appear to
 represent an environmental condition for the Site.
- Urban dumping appears to have occurred at the Site with piles of soil, asphalt, concrete, trash, and landscape debris observed at the Site. The origin of the soil stockpiles is not known. It is also not known whether contaminants are present within the soil stockpiles.

7.3 DEVIATIONS AND ADDITIONAL SERVICES

The scope of this Phase I ESA does not incorporate ASTM Standard non-scope considerations, such as asbestos-containing material, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality/vapor intrusion, and high-voltage power lines.

7.4 CONCLUSIONS

Kleinfelder has performed a Phase I ESA, in conformance with the scope of services required by ASTM Designation E 1527-13, our Proposal No. MW151231.001P/RIV16P37969, dated April 7, 2016 and limitations discussed in this report. Exceptions to and deviations from this practice are described in Section 7.3 of this report. This assessment has revealed no evidence of RECs in connection with the Site except for the soil piles of unknown origin that have been dumped at the Site.

7.5 RECOMMENDATIONS

Based on the findings and conclusions of this Phase I ESA, Kleinfelder recommends collection and analysis of soil stockpile samples to assess to assess appropriateness for reuse and/or establish an analytical waste profile for off-Site transportation and disposal.

7.6 DATA GAPS

No data gaps were identified during the preparation of this Phase I ESA.

APPENDIX A STATEMENT OF QUALIFICATIONS

STATEMENT OF QUALIFICATIONS

We declare that to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in CFR Part 312.

Lindsey Dandridge-Perry Environmental Professional

Kathleen A. McDonnell, PG, CEG

California Professional Geologist No. 58/1

The resumes of above-listed environmental professionals performing this Phase I ESA are on file at the Kleinfelder office and are available on request.

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/21/2016 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

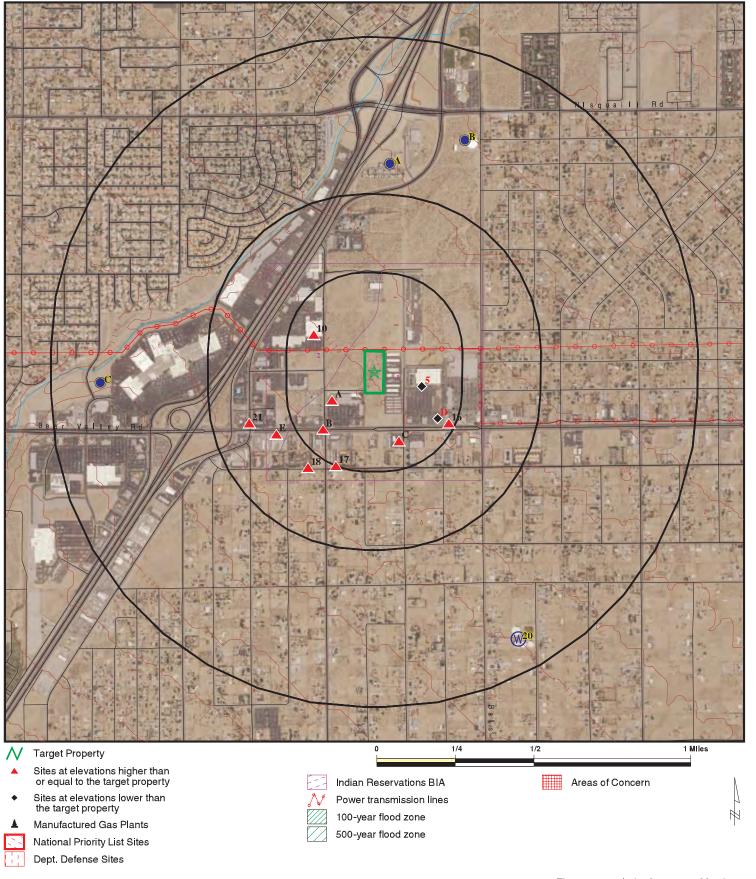

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to

water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.

Primary Waste: DOMEST
Waste Type2: Not reported
Waste2: Domestic Sewage

Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to

water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.

Secondary Waste: Not reported Secondary Waste Type: Not reported

Design Flow: 0
Baseline Flow: 0

Reclamation: No reclamation requirements associated with this facility.

POTW: The facility is not a POTW.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order

should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to

represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as

cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

dairy waste ponds.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to

water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.

Primary Waste: DOMEST
Waste Type2: Not reported
Waste2: Domestic Sewage

Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to

water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.

Secondary Waste: Not reported Secondary Waste Type: Not reported

Design Flow: 0
Baseline Flow: 0

Reclamation: No reclamation requirements associated with this facility.

POTW: The facility is not a POTW.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order

should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to

represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as

cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

Elevation: 3117 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 5620406 HESPERIA, CA

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

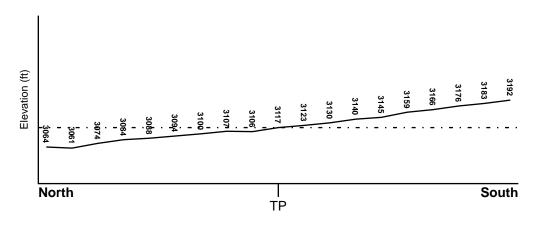

TOPOGRAPHIC INFORMATION

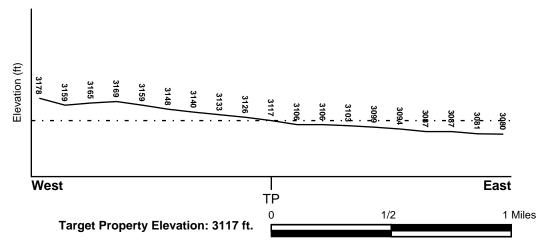

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

 LOCATION
 GENERAL DIRECTION

 MAP ID

 GROUNDWATER FLOW

 Not Reported
 GROUNDWATER FLOW

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: BRYMAN

Soil Surface Texture:

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Boundary				Classification		Saturated hydraulic	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		Soil Reaction (pH)
1	0 inches	9 inches		Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.4
2	9 inches	42 inches		Not reported	Not reported	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4
3	42 inches	59 inches		Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.4

Soil Map ID: 2

Soil Component Name: CAJON

Soil Surface Texture:

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to

excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map. USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EDR Environmental Lien and AUL Search

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- · search for parcel information and/or legal description;
- · search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050 with any questions or comments.

The Grantee Herein was the Foreclosing Beneficiary.

The Amount of the Unpaid Debt was \$1,727,611.29

The Amount Paid by the Grantee was \$1,295,500.00

Said Property is in the City of Victorville, County of San Bernardino

Fidelity National Title Company dba Fidelity National Default Services, as Trustee, (whereas so designated in the Deed of Trust hereunder more particularly described or as duly appointed Trustee) does hereby GRANT and **CONVEY** to

American Plus Bank, N.A.

(herein called Grantee) but without covenant or warranty, expressed or implied, all right title and interest conveyed to and now held by it as Trustee under the Deed of Trust in and to the property situated in the county of San Bernardino, State of California, described as follows:

As more fully described in the Exhibit "A" attached hereto and made a part hereof.

This conveyance is made in compliance with the terms and provisions of the Deed of Trust executed by Glory Bear Valley LLC, a California limited liability company as Trustor, dated 10/9/2007 and recorded on 10/31/2007 as instrument number 2007-0607973 of the Official Records in the Office of the Recorder of San Bernardino County, California. Under the authority and powers vested in the Trustee designated in the Deed of Trust or as the duly appointed Trustee and default having occurred under the Deed of Trust, a Notice of Default and Election to Sell under the Deed of Trust recorded on 12/06/2011 as instrument number 2011-0515134 of the Official Records in the Office of the Recorder of San Bernardino County, California. Trustee has complied with all applicable statutory requirements of the State of California and performed all duties required by the Deed of Trust including sending a Notice of Default and Election to Sell within ten days after its recording and a Notice of Sale at least twenty days prior to the Sale Date by certified mail, postage pre-paid to each person entitled to notice in compliance with California Civil Code 2924b.

TRUSTEE'S DEED UPON SALE

TS #: FRB-112046-CA Loan #: 10004-60001 Order #: 725142511

All requirements per California Statutes regarding the mailing, personal delivery and publication of copies of Notice of Default and Election to Sell under Deed of Trust and Notice of Trustee's Sale, and the posting of copies of Notice of Trustee's Sale have been complied with. Trustee, in compliance with said Notice of Trustee's sale and in exercise of its powers under said Deed of Trust sold said real property at public auction on 5/17/2012. Grantee, being the highest bidder at said sale became the purchaser of said property for the amount bid, being \$1,295,500.00, in lawful money of the United States, in pro per, receipt thereof is hereby acknowledged in full/partial satisfaction of the debt secured by said Deed of Trust.

In addition, this conveyance includes all personal property which was given as security for the Trustor's obligation, as more fully described in the Deed of Trust, as it may have been amended from time to time, and all personal property described in the Commercial Security Agreement, dated as of October 9, 2007, by and between Trustor and Beneficiary, all of which is more specifically described on Exhibit "B" attached hereto, which is incorporated herein by this reference (collectively, the "Personal Property").

In witness thereof, Fidelity National Title Company dba Fidelity National Default Services, as Trustee, has this day, caused its name to be hereunto affixed by its officer thereunto duly authorized by its corporation by-laws.

CERTIFIED RECORD SEARCH FINDINGS

APN: 3093-251-01-0000 VICTORVILLE, CALIFORNIA

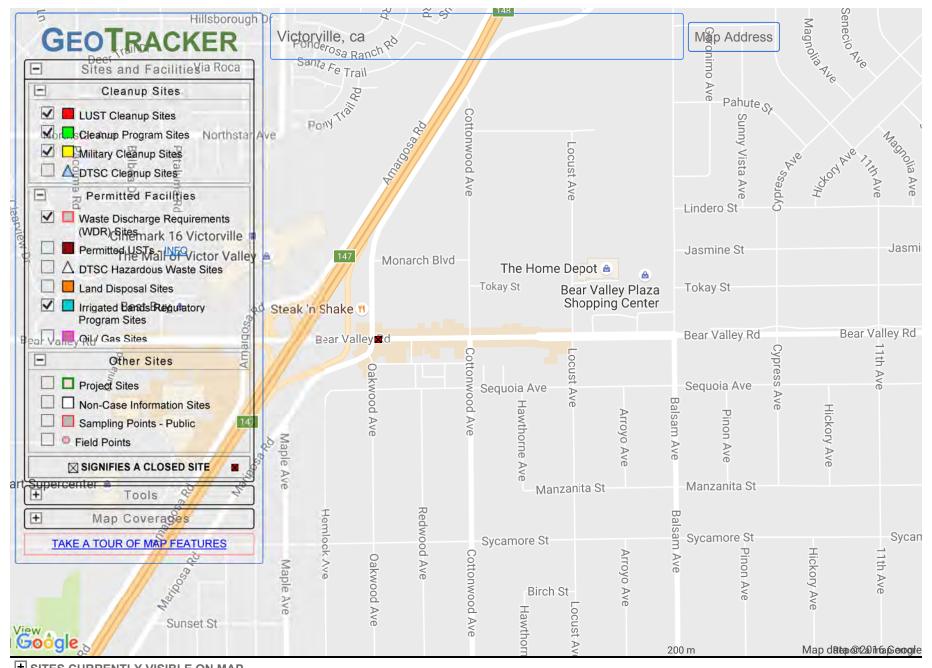

This is to confirm that the OFM Hazardous Materials Division (HMD) has searched its records for any file(s) pertaining to the subject property, as described in your request, and finds no records exist for the above site description(s).

Records maintained by OFM-HMD date back to early 1980's (1984 for some underground storage tanks). Records searched include:

- facilities with hazardous waste generator permits, hazardous materials handler permits, underground storage
 tank permits, universal waste permits, tiered permits, EPCRA facilities, RMP facilities, Cal ARP facilities,
 and/or waste recycling generators, including inactive and/or out of business records, as well as non-permitted
 facility actions;
- logs of permits issued for the removal, installation, and/or modification of underground storage tanks;
- records and databases pertaining to illicit dumping, spill reports and release notifications, and complaints;
- incidents responded to by the hazardous materials emergency response team;
- and sites undergoing remediation for contaminated soil and/or groundwater.

User Questionnaire APN: 3093-251-01 Victorville, CA

Only the client ("user") needs to respond to the following questions:

1)	Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?				
2)	Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?				
3)	As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?				
4)	marke	the purchase price being paid for this property reasonably reflect the fair value of the property? If you conclude that there is a difference, have you dered whether the lower purchase price is because contamination is known or ed to be present at the property?			
5)	the prindica	ou aware of commonly known or reasonably ascertainable information about operty that would help the environmental professional to identify conditions tive of releases or threatened releases? For example, as user,			
	i)	Do you know the past uses of the property?			
	ii)	Do you know of specific chemicals that are present or once were present at the property?			
	iii)	Do you know of spills or other chemical releases that have taken place at the property?			
	iv)	Do you know of any environmental cleanups that have taken place at the property?

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

<u>Year</u>	Target Street	Cross Street	<u>Source</u>
2013	$\overline{\checkmark}$		Cole Information Services
2008	$\overline{\checkmark}$		Cole Information Services
2003	$\overline{\checkmark}$		Cole Information Services
1999	$\overline{\checkmark}$		Cole Information Services
1995	$\overline{\checkmark}$		Cole Information Services
1992	$\overline{\checkmark}$		Cole Information Services
1985	$\overline{\checkmark}$		Haines Criss-Cross Directory
1980	$\overline{\checkmark}$		Haines Criss-Cross Directory
1975	$\overline{\checkmark}$		Haines Criss-Cross Directory

EDR Historical Topo Map Report

EDR Inquiry # 4729157.4

09/16/16

Site Name: Client Name:

Not Reported Kleinfelder, Inc.

Not Reported 2 Ada, Suite 250

Victorville, CA 92395 Irvine, CA 92618-0000

Contact: Lindsey Dandridge-Perry

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Kleinfelder, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:		Coordinates:	
P.O.#	NA	Latitude:	34.473098 34° 28' 23" North
Project:	Victorville	Longitude:	-117.335941 -117° 20' 9" West
_		UTM Zone:	Zone 11 North
		UTM X Meters:	469149.56
		UTM Y Meters:	3814665.36
		Elevation:	3117.07' above sea level

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Kleinfelder, Inc. on Sep 16, 2016.

TARGET PROPERTY

Not Reported Victorville, CA 92395

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: NO PERMITS IDENTIFIED

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

GLOSSARY

General Building Department concepts

- ICC: The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections): This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- Jurisdiction: This is the geographic area representing the properties over which a Permitting Authority has
 responsibility.
- GC: General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- Journeymen: Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- HVAC (Mechanical, Heating & Air companies): HVAC = Heating, Ventilation, and Air Conditioning.
- ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release): Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- "Pull" a permit: To obtain and pay for a building permit.
- CBO: Chief Building Official
- Planning Department: The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- Zoning Department: The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- Zoning District: A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- PIN (TMS, GIS ID, Parcel#): Property Identification Number and Tax Map System number.
- State Card (Business license): A license card issued to a contractor to conduct business.
- Building Inspector (Inspector): The inspector is a building department employee that inspects building construction for compliance to codes.
- C.O.: Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000 Permit Type: Bldg -

New Permit Number: 101000000405 Status: Valuation: \$1,000,000.00 Contractor Company: OWNER-BUILDER

Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

November 14, 2016 Kleinfelder Proposal No. 20172135.001A

San Bernardino County
Architecture and Engineering Department
385 North Arrowhead Avenue, Third Floor
San Bernardino, California 92415-0184

Attention: Mr. Scott Hughes, Project Manager

SUBJECT: Limited Phase II Environmental Site Assessment

Portion of Assessor's Parcel Number 3093-251-01

Victorville, California

Dear Mr. Hughes:

Pursuant to Kleinfelder's *Proposal for Limited Phase II Environmental Site Assessment* dated October 28, 2016, Kleinfelder collected soil samples of soil from stockpiles that have apparently been dumped at the site. One stockpile consisted of soil, concrete, asphalt, and trash. The other stockpile consisted of soil and landscaping debris. Eight soil samples were collected from each stockpile (for a total of 16 soil samples). The soil samples were collected in 4-ounce glass jars, and submitted to Enviro-Chem, Inc., a California accredited analytical laboratory. Two of the soil samples from each stockpile were preserved in the field in VOA vials for volatile organic compounds (VOCs) analysis using United States Environmental Protection Agency (US EPA) 5035. These field preserved samples were then analyzed by the lab for VOCs using US EPA Method 8260B. Kleinfelder requested the laboratory composite the soil samples stored in glass jars using a ratio of 4:1 (four samples from each waste stream were composited into one sample, resulting in two composite samples from each waste stream). The composite soil samples were analyzed for the following:

- Total petroleum hydrocarbons (TPH) with carbon chain identification using US EPA Method 8015B;
- Semi-volatile organic compounds (SVOCs) using US EPA 8270;
- Organochlorine pesticides (OCPs) using US EPA 8081A;
- Polychlorinated biphenyls (PCBs) using US EPA 8082; and
- California Code of Regulations Title 22 Metals using US EPA Methods 6010B/7471A.

In summary, the analytical results are as follows:

- VOC concentrations were not measured above laboratory reporting limits.
- Motor oil-range TPH concentrations were measured in all four composite soil samples at concentrations ranging between 95.6 and 334 milligrams per kilogram (mg/kg). Gasolineand diesel-range TPH concentrations were not measured above laboratory reporting limits.

- Bis(2-ethylhexyl) phthalate was detected in two composite samples at concentrations of 0.722 and 3.27 mg/kg. No other SVOCs were measured above laboratory respective reporting limits.
- OCPs and PCBs were not detected above laboratory reporting limits.
- The following metals were detected (the maximum detected concentrations are shown in parentheses in mg/kg):
 - i) Arsenic (3.98 mg/kg)
 - ii) Barium (82.4 mg/kg)
 - iii) Total Chromium (20.7 mg/kg)
 - iv) Cobalt (5.55 mg/kg)
 - v) Copper (18.3 mg/kg)
 - vi) Lead (10.3 mg/kg)
 - vii) Mercury (0.092 mg/kg)
 - viii) Nickel (10.5 mg/kg)
 - ix) Vanadium (39.5 mg/kg)
 - x) Zinc (78.3 mg/kg)

Based on the analytical results, the stockpile material may be disposed as non-hazardous waste. Kleinfelder recommends that the analytical results be shared with the proposed disposal facility to confirm that the results fall within their acceptance criteria.

If you have any questions, please contact the undersigned at 949.727.4466.

Sincerely,

KLEINFELDER

Lindsey Dandridge-Perry Staff Professional II

COMMENTS

DF = Dilution Factor

PQL = Practical Quantitation Limit

Actual Detection Limit = PQL X DF

ND = Below the Actual Detection Limit or non-detected

TTLC = Total Threshold Limit Concentration

STLC = Soluble Threshold Limit Concentration

@ = Must meet both the STLC Limit at 560 and EPA-TCLP Limit at 5

* = STLC analysis for the metal \underline{is} recommended (if marked)

** = Additional Analysis required, please call to discuss (if marked)

*** = The concentration exceeds the TTLC Limit, and the sample is

defined as hazardous waste as per CCR-TITLE 22 (if marked)

-- = Not analyzed/not requested
